## Welcome

### *We are very pleased to welcome you in Rome again on February 12 - 14, 2015!*

The partnership with TCT/CRF is an infusion of new energy to JIM to better deliver a fruitful educational experience to the attendee.

**JIM is "The Live Case Meeting" and it will keep this unique characteristic.**

We will demonstrate what we mean for optimal implantation of a drug eluting stent and of bioresorbable scaffold in complex coronary lesions.

We believe that this strategy will further improve the safety and performance of these devices.

Live demonstrations will include treatment of adult valvular heart disease, structural heart disease. We will introduce new devices without losing close contact to the daily practice of the busy Interventionist.

The meeting maintains its format with "State of the Art" lectures given by experts in the field. Lunch and evening symposia fulfill this target. Symposia from different Cardiac Societies, including a PCR Symposium, will diversify the lectures and open the access to more contributions.

This year we have again live transmission on Saturday morning in order to maintain a well-balanced distribution of live cases throughout the entire meeting.

More emphasis and expansion are given to those sessions in which attendees can present and discuss cases.

Once again the Meeting will take place in Rome at Ergife Palace Hotel. It combines a comfortable accommodation solution with a large and efficient Congress Centre.
